Outfitter Δ is a revolutionary app which will shape the future of how people design and style their everyday look.

The app allows our users to improve their fashion sense in a more innovative and effective way. By simply taking a photo of new pieces of clothing and adding it into your photo album, the app allows you to effortlessly customize your attire combination with a few simple swipes.

Your wardrobe combinations are only limited by your creativity, the app offers as much freedom as provided, making it suitable for all ages. This app allows you to save historical attire combinations you created, and share your ideas to a global audience through social media outlets such as facebook and tumblr. Your friends would rate and comment on your fashion sense and give you the honest opinion you need to become the next trendsetter in the world of fashion.
