Abstract. Unemployment is one of the biggest problems faced by Indonesia, one of the main causes of unemployment is the lack of public awareness about the importance of education, so it impedes Indonesia to become a developed country. Unemployment rate in Indonesia is increasing from year to year. Unemployment is generally caused because the labor force is not proportional to the number of jobs that can absorb it. Unemployment is often a problem in the economy due to the presence of unemployment, productivity and incomes will be reduced so as to cause of poverty, social problems, and other. Although government has sought to minimize unemployment, but these efforts have not done optimally. Therefore, we need to further follow-up and continuous. Based on these problems, offered solutions such as application creation as an alternative media that is expected to minimize unemployment in Indonesia. Conten of application about all the job information from various companies located in Indonesia. application not only benefit the company, but also the advantages obtained by job applicantss. Step-making application starting from establish a central office services, creation application, validation and market the product, start charging registration and account information, enterprise search and select prospective employees, and employees get confirmation from the company. The purpose is to facilitate the creation job applicantss have full information about job vacancies in Indonesia. Moreover, this social networking website easier for companies or institutions for prospective employees for his/her company.
